= 4	James Parry	Wessex Wombat PAW 1.5	42	14.70	61.2	6.5

The final proved to be an excellent day, both weather wise and flying. Five pilots flew in near perfect conditions and an early morning start gave Den Saxcoburg enough extra speed to win on the day from Dick James, whose model crashed and needed many repairs throughout the day. However, this produced a tie in the League series with both pilots scoring 39 points and so a fly-off was arranged. By the end of the day the glue had had time to set on Dick's model (who was also using his spare engine!) and his fly-off time of 12 seconds (75 MPH) for the 5 laps was just 0.46 seconds quicker than Den who managed a very respectable 72.2 MPH. These two speed fliers are ahead of the rest at present, but winter work on engines and new models should see speeds exceed 70 MPH for an increasing number of pilots. The first year saw seven pilots have a go at this deceptively challenging formula. Interest has been shown by quite a few more fliers and we look forward to next season. A speed competition, run to a very simple 5 lap formula with inexpensive models has proved to be very popular and the rules remain the same for 2011.
